Portfolio Case Study: XOFTSYSTEMS Website Design (Wix)

Overview

Designed and developed the official XOFTSYSTEMS website using Wix, focusing on a modern, service-oriented layout tailored for Microsoft technology consulting. The website highlights services like Dynamics 365, SharePoint, Power Platform, and Microsoft 365 solutions targeting business clients.

Objectives

- Create a professional IT services website
- Clearly present Dynamics 365 & Power Platform offerings
- Improve user navigation & service visibility
- Build a clean and responsive UI/UX

Tools & Technologies

- Wix (Website Builder)
- JSON-based UI components / cards
- UI/UX Design Principles
- Responsive Design

My Contributions

UI/UX Design:
- Designed clean landing page layout
- Structured sections for services and products

Wix Development:
- Built complete website using Wix editor
- Implemented navigation, service pages, and contact forms

Custom Design Elements:
- Created custom cards and sections
- Improved content hierarchy and readability

Content Structuring:
- Organized services into implementation, integration, consulting
- Ensured clear messaging for business users

Challenges

- Structuring complex IT services in a simple UI
- Maintaining professional design within Wix limitations
- Balancing design and technical content clarity

Solutions

- Used section-based layout for clarity
- Designed reusable UI components
- Focused on minimal and clean design system

Results

- Delivered a fully functional business website
- Improved service presentation and clarity
- Created scalable design structure
- Strengthened brand digital presence

Key Skills

- Wix Development
- UI/UX Design
- Information Architecture
- Microsoft Ecosystem Understanding
- Web Content Structuring
