Contact Extraction from Mailbox

The Overview

Sales team needed a way to build a clean contact list only from people they actually engaged with. The automation scanned mailbox replies and captured signatures into a structured Excel review file.

The Challenges

- Signatures in many different formats
- Risk of creating duplicate contacts
- Need to group contacts from same email thread

The Solution

- Daily scheduled mailbox processing
- Pattern recognition for email, phone and company
- GroupID generation
- Review flag before final use

Solution Highlights

- Duplicate prevention logic
- Optional AI categorization

The Results

- Reliable prospect database
- Marketing team received ready- to- use list
