Leave Request Management App

Overview

I designed and implemented a centralized Leave Management Application to replace fragmented email and spreadsheet-based processes. The solution streamlined how employees request leave, how managers approve it, and how HR monitors balances and policies—all within a single, intuitive interface.

Challenges I Solved

- Eliminated dependency on emails for leave requests
- Removed lack of visibility into employee leave balances
- Reduced delays in approval workflows
- Introduced a centralized holiday calendar
- Simplified quota management across departments

Solution Delivered

- Built Power Apps solution integrated with SharePoint
- Structured leave request submission
- Real-time leave balance tracking
- Automated approval workflows
- Admin panel for HR management

Key Highlights

- Role-based access control
- Automated notifications
- Request history tracking
- Secure backend

Results & Impact

- 80% reduction in manual effort
- Faster approvals
- Improved transparency
- Better HR reporting
