Monthly Expense Management System

The Overview

Finance department received expenses through paper forms and scattered emails. Receipts were missing and monthly consolidation consumed many working days. The objective was to digitize the full lifecycle from submission to approval and export for accounting.

The Challenges

- Employees submitted expenses in different formats
- Receipts were lost or unreadable
- Managers had no structured approval screen
- Finance team retyped data into accounting software

The Solution

- Created expense entry app with attachment upload
- Multi- item claim per report with categories
- Manager approval and rejection with comments
- CSV export aligned with finance system
- Exchange rate handling for foreign expenses

Solution Highlights

- Dashboard for users and managers
- Reason capture when rejecting a claim
- Secure role management

The Results

- Faster reimbursement cycle
- Clean and auditable financial records
- Monthly closing effort reduced drastically
